

As a XM radio subscriber I would like to say that I enjoy having all these stations. It does not seem fair that an organization like NAB can dictate what I, a PAYING customer, can and cannot listen to through the services provided by XM radio. I greatly appreciate having the opportunity to voice my opinion and hope that in the end, the people at the FCC will realize that XM radio is a product which millions of people have decided to pay for thier services and that we should be able to decide what stations we want, not another party. It is a shame that there are organizations out there that are trying to take away our freedom of speech. Thank you.
